

Position type: Postdoctoral Position at the NIH

Position title: Cytokines and T cell immunology

Position Description: A post-doctoral position in cellular and molecular immunology is available in the lab of Dr. Hyun Park, Experimental Immunology Branch, National Cancer Institute in the main campus of the NIH in Bethesda, MD. The laboratory's research interest focuses on understanding the role of cytokine receptor expression and signaling in T cells. Specifically, we seek to understand the transcriptional and post-transcriptional mechanisms of cytokine receptor expression and downstream signaling in T cells. More information on projects in the Park lab can be found here: <https://irp.nih.gov/pi/jung-hyun-park>.

Qualifications:

Candidates should have a Ph.D, M.D., or equivalent degree, less than 4 years of post-doctoral experience, and expertise in immunology, cell biology, and biochemistry. Previous experience in molecular biology is essential. The candidate should have excellent writing and communication skills. This position is subject to a background investigation. The NIH is dedicated to building a diverse community in its training and employment programs.

To Apply:

Applicants should send their *curriculum vitae*, bibliography, and the names and contact information of three references to:

Hyun Park: parkhy@mail.nih.gov

Employer name: National Cancer Institute, NIH

Position location: Bethesda, MD
